

## INSTALLATION GUIDE

INTEGRATED INFOTAINMENT TOUCH SCREEN SOLUTION FOR  
FORD TRANSIT CONNECT / TOURNEO 2013 - 2021

PART NUMBER: UN1810E-FD4

## ABOUT THIS PRODUCT

---

Upgrade your Ford Transit's radio with the HEIGH10® 10-inch infotainment system. Retain all OEM features, vehicle settings, and more. All in one easy to install, plug-and-play package.

The HEIGH10® is designed to enhance screen size and infotainment features for drivers which include Apple CarPlay, Android Auto, DAB+, and Bluetooth streaming. Paired with the vehicle retention interface, key vehicle settings will be retained and controlled through the HEIGH10® display by your steering wheel controls.

The components of this kit are compatible for the Ford Transit Connect / Tourneo 2013 - 2021

**Please note: Not compatible for vehicles with upper dash display / amplified models.**

## CONTENTS

---

- HEIGH10® unit with fitting accessories and wiring
- Black double DIN fascia plate (with accessories)
- Vehicle retention interface with plug-and-play harness
- Vehicle specific antenna adapter (AM/FM)
- Stinger stereo patch lead
- Instruction manual

## FITTING GUIDE

---

### STEREO REMOVAL

Start by turning off the ignition and removing the key from the vehicle.

Locate the plastic trim panel that surrounds the radio and climate control unit on the center console. It is held in place by clips and may require some force to remove. You can use a plastic trim removal tool to avoid damaging the panel.

Gently pry the trim panel away from the dashboard to release the clips. Start at the bottom of the panel and work your way up, being careful not to damage the panel or any surrounding components.

Once the trim panel is removed, you should see four screws that secure the radio to the dash. Use a Phillips-head screwdriver to remove these screws.

Gently pull the radio out of the dash, being careful not to damage any of the wiring or connections.

Disconnect the wiring harnesses and antenna cable from the back of the radio. To disconnect the wiring harnesses, press down on the locking tabs and pull the connectors apart. To disconnect the antenna cable, simply pull it straight out of the back of the radio.

The radio should now be completely disconnected from the vehicle.

## FITTING GUIDE

---

Take the HEIGH10® components and begin to assemble the core components in accordance with the “*Installation Manual*” that comes with unit.

### HEIGH10 ASSEMBLY

## FITTING GUIDE

---

### FASCIA PLATE SET-UP

1. With the HEIGH10® unit configured correctly, attach the fascia brackets to the relevant sides of the radio module using the screws within the kit. Place into the vehicle and roughly test fit with the fascia to measure whether the brackets need moving forwards/backwards.
2. With the brackets aligned correctly, attach the fascia to the brackets over the top of the unit using the screws that come within in the kit.
3. Once all of the steps in '*Stereo Installation*' are complete, place the assembly into the dashboard and screw down using the pre-existing screws. Then reassemble the main fascia panel.

### INTERFACE SET-UP

1. Take the 14-way connector on the vehicle interface harness and plug this into the relevant connection on the side of the interface.
2. Take the 12-way connector of the stereo patch lead and plug this into the relevant connection on the side of the interface. Then take the 3.5mm jack and attach this to the HEIGH10® unit.
3. Attach the 4-way camera extension harness to the interface.
4. Attach the antenna adapter to the vehicles pre-existing connection and the back of new HEIGH10® unit.
5. Attach the USB retention lead in between the vehicle pre-existing USB connector and the HEIGH10® unit.
6. Connect the male yellow RCA to the 'reverse camera input' on the back of the new stereo.
7. Connect the aftermarket reverse camera (if required) to the female yellow RCA on the camera extension harness.

*Note: ensure the 'Camera Connected' option in the 'Preferences' menu is set to 'Yes' for the camera to function correctly.*

8. Attach the additional wiring on the harness to the back of the stereo:  
**Pink** - Speed Pulse **Green** - Park Brake **Purple** - Reverse
9. When all the above wires (and any additional accessories) have been connected, finally make the power connections between the stereo and the vehicles pre-existing connector.

For a full connection breakdown of the HEIGH10® unit, see the "*Installation Manual*" that comes with the unit.

## ABOUT THIS PRODUCT

---

### CTSFO015.2

Analogue Steering Wheel Control Interface for Ford vehicles. For vehicles without OEM display.

White/Black	Left Front Speaker -		

### PRIOR TO INSTALLATION

---

Read the manual prior to installation. Technical knowledge is necessary for installation. The place of installation must be free of moisture and away from heat sources. Please ensure that the correct tools are using during the installation to avoid damage to the vehicle or product. **Connects2 can not be held responsible for the installation of this product.**

1. Remove and disconnect the original head unit.
2. Connect the 12 way molex connector of the head unit patch lead (supplied separately) to the interface.

3. Connect the opposite end of head unit patch lead to the head unit steering wheel control input on the back of the aftermarket head unit.

*NB: This may be a 3.5mm jack plug or a wire input depending upon the head unit brand being fitted. Please see the head unit installation manual for further information on where to connect.*

**Important: This step must be completed before connecting power to the interface. Failure to so do may result in no steering wheel control function.**

## FITTING GUIDE

---

4. Connect the 14 way molex connector to the interface

5. Connect the male power/speaker ISO harness to the female power/speaker ISO harness from the aftermarket head unit. For aftermarket head units without an ISO connector, please refer to "Wiring Colour Codes" on Pg. 2.

## FITTING GUIDE

---

6. Connect the black female vehicle specific connectors on the harness to the male vehicle connector from the vehicle. Test head unit for correct operation.
